Research shows: Coffee Helps Prolong Life

- Consuming coffee everyday (three to four cups a day) show more benefits than harm across various health outcomes. It was associated with reduced risks of all-cause mortality, cardiovascular mortality, cardiovascular disease, and several specific cancers as well as neurological, metabolic, and liver conditions. It also helps to protect the liver and prevent gallstones.
- Professional Manufacturing Technology: Choosing the right roasting temperature and time as a safety standard to ensure that Acrylamide and Diterpenes are reduced to the lowest. Freeze-dried, instant drip coffee (powder form), maximizes the antioxidants of the coffee and with adding black goji berries, it is the most unique beauty coffee in the market.

研究显示：咖啡可有助于延长寿命

• 每天适量饮用咖啡（大约三到四杯）对各种健康结果是利大于弊。它不仅与全因死亡率和心血管疾病死亡率下降相关, 还与代谢性综合征, 患有心血管疾病, 某些癌症以及神经系统相关疾病的风险下降有关, 它还有助于保护肝脏和预防胆结石。

• 专业制造技术：选择最佳的烘焙温度和时间,以确保丙烯酰胺和二萜类化合物降至最低的安全标准。冷冻干燥萃取, 即溶滴滤咖啡（粉末片状），最大限度发挥咖啡的抗氧化剂，并添加黑枸杞，是市场上绝无仅有最独特的美颜咖啡。
